

FetchIT: Smart IoT Shopping Assistant

FetchIT can be used by Retailers, Offices, Hospitals and even individual households, wherever there is need for making a list of frequently bought items. FetchIT is an IoT device that sits anywhere around, where things are used. FetchIT is effortless to use; just “press the buttons” when you remember things, to make a list, and “swipe” to order. A shopping list is automatically generated & becomes available on the phone/internet. This list can be shared with friends, family members, and even your favorite grocery stores.

What FetchIT Can Do!

- Assists to manage daily needs and remembers them
- Lightweight, can be stowed anywhere
- Simple, can be used by any family member
- Easy setup process
- No display, resulting in long battery life (> 18 months)
- Press device buttons to register your grocery needs
- Shopping list can be shared with multiple parties on email/whatsapp
- An item can be added to the list, by scanning barcode
- Looks up products from Walmart and displays options
- Allows comparable shopping for the selected item
- Upto 16 items can be stored in list and ordered
- List can be created using iOS/android app (MyFetchIT) or from the FetchIT device
- Place order to Walmart or your favorite grocery store

FetchIT for Simplified Shopping

Portable, can be stowed anywhere

FetchIT is lightweight and can be easily placed anywhere, where things are used frequently. For example, in laundry room, kitchen, study/office room etc.

Democratizing shopping process

The customer can choose from a variety of retail providers to get the best product available, without visiting the store.

Family tool

FetchIT is so easy to use that even kids can press the button to add the “almost finished”/“finished” items in the shopping list.

Saves time

No need to spend time in making list before shopping; items can be added by just pressing the appropriate button.
