# NetworkSmartware – *with* *Rezrv*

Quick Start Guide

Setting-Up Basics

1. How to install your router

1. Turn the antennas so they are positioned straight up and plug in your router to a power source.

2. Connect the Internet cable from your modem to the blue WAN port on your router. Wait until the indicator light on your router is solid.

3. On the first boot, the router will update itself with the latest software. Please leave the router connected for ten minutes for the update process to complete.

Primary Router

Netsmart Router

Connect an Ethernet cable from your Modem or Primary Router to the blue WAN port on your Netsmart Router as shown in the image

Power adapter

4. Connect to the secure wireless SSID, which is mentioned at the back of your router. (You can change the network name and password later.)

   Note—_You will not have Internet access until the router setup is complete._

2. Rezrv Mobile Apps

❏ You can configure your router by using Rezrv Mobile App available in iOS App Store and Google Play Store.
❏ Name of the app: **REZRV**

iOS App Store: Rezrv iOS App

Google Play Store: Rezrv Android App
